## MAKING A MEAL PLAN IS AS EASY AS 1, 2, 3.

Circle your favorite foods in the food list and write them on the meal-planning worksheet.

Decide how many meals you want to eat each day. Then, write the number of meals and the macros on the top of your meal-planning worksheet.

| TRANSFORMATION CHALLENGE |         |          |       |               |     |   |    |
|--------------------------|---------|----------|-------|---------------|-----|---|----|

Determine the portion sizes of your favorite foods.

To figure out your portion sizes, find where the food item and your macros intersect on the food list. For example, if you want to eat chicken and your protein macros are 43, find where chicken and 43 intersect. The number is 5.4. Chicken is measured in ounces, so you will write 5.4 ounces next to chicken on your meal plan worksheet.

|     | PROTEIN                             |             |             | GRAMS | 3   |     |     |     |     |     |     |     |     |     |     |     |     |     |     |      |     |

## **MEAL-PLAN WORKSHEET**

**MACROS PER MEAL** 

**# OF MEALS PER DAY** 

Write the foods you circled from the food list and determine the portion sizes based on the number of meals you plan to eat.

Remember, if a food is listed as a protein and carb; carb and fat; or protein and fat, count both macros. If something is labeled count everything – or, you eat something that isn't on the food list – count the protein, fat, and carb macros in that food.

| PROTEIN | Amount | <b>CARB</b> | Amount | FAT | Amount | FREE VEGGIES | Amount |
|---------|--------|-------------|--------|-----|--------|--------------|--------|
|         |        |             |        |     |        |              |        |
|         |        |             |        |     |        |              |        |
|         |        |             |        |     |        |              |        |
|         |        |             |        |     |        |              |        |
|         |        |             |        |     |        |              |        |
|         |        |             |        |     |        |              |        |
|         |        |             |        |     |        |              |        |
|         |        |             |        |     |        |              |        |
|         |        |             |        |     |        |              |        |
|         |        |             |        |     |        |              |        |
|         |        |             |        |     |        |              |        |
|         |        |             |        |     |        |              |        |

Now that you know how much of each food to eat, it's time to make a week's worth of meals.

Assemble the foods into a meal. Remember to sandwich your workout between your carb meals.

## **MACROS PER MEAL**
